

# How to Properly Post Your 9-1-1 Address

## Residents, Townhouses and Businesses

- On the Mailbox:  
3” reflective numbers
- On the Structure  
4” reflective numbers
- Whichever method is chosen, the address must clearly identify which structure the address belongs to and must be visible from both sides of the street or road the structure is located on or is closest to.
- All posted addresses must be visible during both day and nighttime hours and contrast in color with the background to which they are affixed.
- Please check your existing numbers and make sure they are legible

## Private Lane and Long Driveways

- If any addressed structure is located so that the address number is not clearly visible from the street, an additional address number should be posted at the intersection of the driveway with the public street  
4” reflective numbers contrasting in color with the background on which they are affixed. Visible day and night; placed upon a post or other structure

## Industrial and Commercial Structures

- Not less than 10” reflective numbers
- When possible, the number shall be displayed beside or over the main entrance of the structure

### Apartment Buildings

- 6” reflective numbers
- Display above or the to side of primary entrance
- Individual units within the complex shall be displayed on, above or to the side of the doorway of each unit
